

Enso Discoveries PRP-System Swap Out Program

Some of your best customers are innovators who have been offering PRP injections for some time. They know the benefits and the costs of these treatments can be astounding, and the investment required by clinic and pet owner often limit broader or more frequent use. The cost of innovation is always high, until someone does something differently. That someone is Enso Discoveries, and we are making regenerative medicine affordable and available to all veterinary practices!

Now that your customers know why Rebound is the best choice, we want to remove any obstacles that may be standing in the way of getting them started TODAY! Enso Discoveries will help your clinics trade in their old system for one that works to help grow their practices and protect more outcomes.

Let the Enso Team get involved and help your customers switch to Rebound TODAY!

Who Qualifies?

- Current PRP users who are considering a switch to Rebound
- Existing PRP customers currently paying off any PRP related capital equipment
- Customers holding inventory of competitive PRP devices

Customer/Hospital Instructions:

Buy 10 Rebound PRP/PRF Kits (mix or match) **TODAY** from your distributor representative and schedule a time to speak with the Enso Team.
